

GB FABRICATION
Architectural & Structural Metalwork

ABOUT US

GB Fabrication are a Birmingham based business with over 40 years collective experience in the specialised metalwork industry.

Our emphasis is that of professionalism and quality, offered at competitive prices, blending the skills of both contemporary and traditional to produce an array of metalwork and fabrications for businesses, public and heritage buildings, and personal dwellings.

Our vast body of work sees our portfolio reach across the United Kingdom and is a feature in some of the most renowned and establishments. We proudly boast a history of working for, and collaborating with, prestigious brands and designers to consistently craft the finest quality of workmanship.

We utilise aluminium, stainless steel and mild steel as our materials of choice, blending accent material such as wood and glass to create both the striking and the functional.

SERVICES

GB Fabrication utilise only trusted methods and products to bring in to fruition a blend of reliable durability and stunning aesthetics. Our metalwork can be accented with the use of wood, glass and other materials.

We specialise in the use of aluminium, stainless steel and mild steel. Metal coatings include simple primers and highly polishing, powder coating, galvanizing, aluminium anodising to various treatments.
